OFFICIAL PROJECT PROOF DOCUMENT

Portfolio Website Creation Project

Comprehensive Technical Report & Verification of Completed Personal Developer Website

STUDENT NAME	PROGRAM / SPECIALIZATION	INSTITUTION	SUBMISSION DATE
Bajjuri Akshith	**B.Tech CSE (Cybersecurity)**	**SR University, Warangal**	**October 2026**

1 Project Overview

This project encompassed the design, development, optimization, and responsive implementation of a modern, professional personal portfolio website for **Bajjuri Akshith**. The portfolio establishes a cohesive technical presence as a **B.Tech CSE student specializing in Cybersecurity**, presenting verified academic credentials, cybersecurity trainee laboratory practice, foundational software development skills, real-world technical projects, recognized hackathon achievements, and official certifications.

2 Project Objectives

✓ Showcase Skills & Projects

Provide a high-contrast, professional showcase of technical proficiencies, cybersecurity trainee tools, and projects in blockchain supply chains and ML phishing detection.

✓ Clean Design & Easy Navigation

Utilize a premium dark cybersecurity-inspired aesthetic with sticky glassmorphic navigation, active section indicators, and instant access to project details.

✓ Mobile-Friendly & Responsive Layout

Engineer a fully responsive layout verified across desktop, tablet, and mobile viewports with an accessible slide-out mobile drawer menu.

✓ Professional Online Presence & Opportunities

Create a recruiter-friendly digital profile to directly support internship applications, student opportunities, and freelance engagements.

3 Technologies Used

Frontend Framework

React 19 (Component-driven architecture, modular state management, hooks)

Build Tool & Bundler

Vite 8 (Fast HMR development server, optimized ES module production build)

Styling & Design System

Tailwind CSS 3 (Custom dark cyber palette, glassmorphism, responsive utilities)

Iconography

Lucide React & custom SVG brand icons (GitHub, LinkedIn, LeetCode)

Typography & Standards

Inter & JetBrains Mono fonts, Semantic HTML5, accessible ARIA attributes

Version Control & CI/CD

Git, GitHub, automated GitHub Actions workflow, Render blueprint

4 Website Features Implemented

- ✓ Fully responsive layout across all device viewports
- ✓ Real-time active section indicator tracking
- ✓ Hero section with verified status pill & CTAs
- ✓ About section with SR University academic identity card
- ✓ Cybersecurity trainee experience timeline & tools
- ✓ Accessible Project Detail Modal with Esc & backdrop close
- ✓ Education history timeline (SR University & Narayana Jr)
- ✓ Direct PDF resume download (Bajjuri_Akshith_Resume.pdf)
- ✓ One-click copy utilities for direct email & phone
- ✓ Sticky glassmorphism navigation with scroll detection
- ✓ Mobile slide-out hamburger menu with auto-close
- ✓ Interactive cybersecurity telemetry visual card
- ✓ Categorized technical skills (no fake percentage meters)
- ✓ Projects showcase with custom architectural graphics
- ✓ Official certifications grid with institution badges
- ✓ Hackathon team recognition card (Top 9 Finalist)
- ✓ Functional contact form with validation & mailto fallback
- ✓ Floating Back-To-Top button with smooth scrolling

5 Verified Project Content (Single Source of Truth)

Personal Identity & Education

- **Bajjuri Akshith** | Warangal, Telangana, India
- **SR University:** B.Tech CSE (Cybersecurity), 2023–2027, CGPA: 7.1 / 10
- **Narayana Junior College:** Intermediate (MPC), 2021–2023, 78.7%

Technical Skills & Tooling

- **Languages:** Python, Java | **Databases:** SQL, MySQL
- **Web:** HTML, CSS, JavaScript | **Tools:** VS Code, Git, GitHub
- **Trainee Security Tools:** Wireshark, Nmap, Burp Suite, Kali Linux

Cybersecurity Trainee Experience

Penetration Testing & Network Security Trainee

- Hands-on practice with Wireshark, Nmap, Burp Suite, and Kali Linux.
- Network security, vulnerability assessment, web security, and traffic analysis.

Technical Projects & Achievement

- **Eco Chain Shipping:** Blockchain, Smart Contracts, Web Dev.
- **Intelligent Phishing URL Detection:** BERT, DOM, HYNA, XGBoost.
- **Achievement:** Top 9 Finalist as a team in On-Campus Hackathon 2023.

6 Website Verification Screenshots (Part 1: Homepage & About)

Proof 1: Homepage & Hero Section (Desktop View) — Factual introduction, verified status pill, action CTAs, and interactive cybersecurity telemetry card.

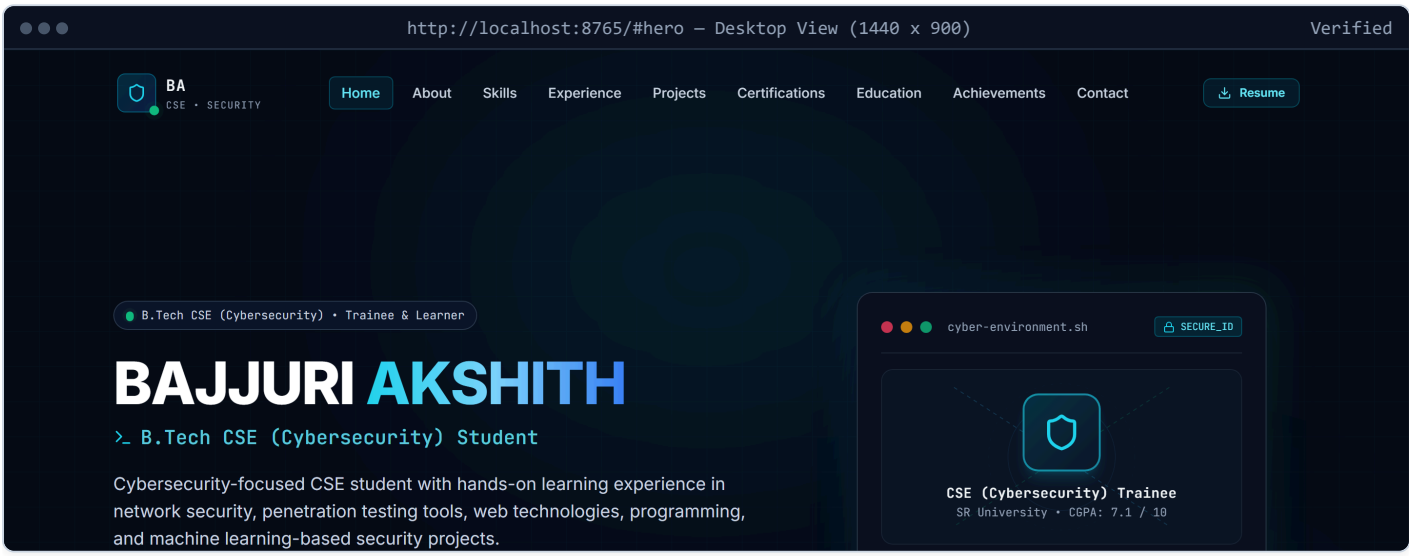

Figure 1: Completed Hero Section featuring high-contrast typography, resume download CTA, and cybersecurity telemetry card.

Proof 2: About Me Section & Verified Academic Identity Card — Academic verification for SR University and technical narrative.

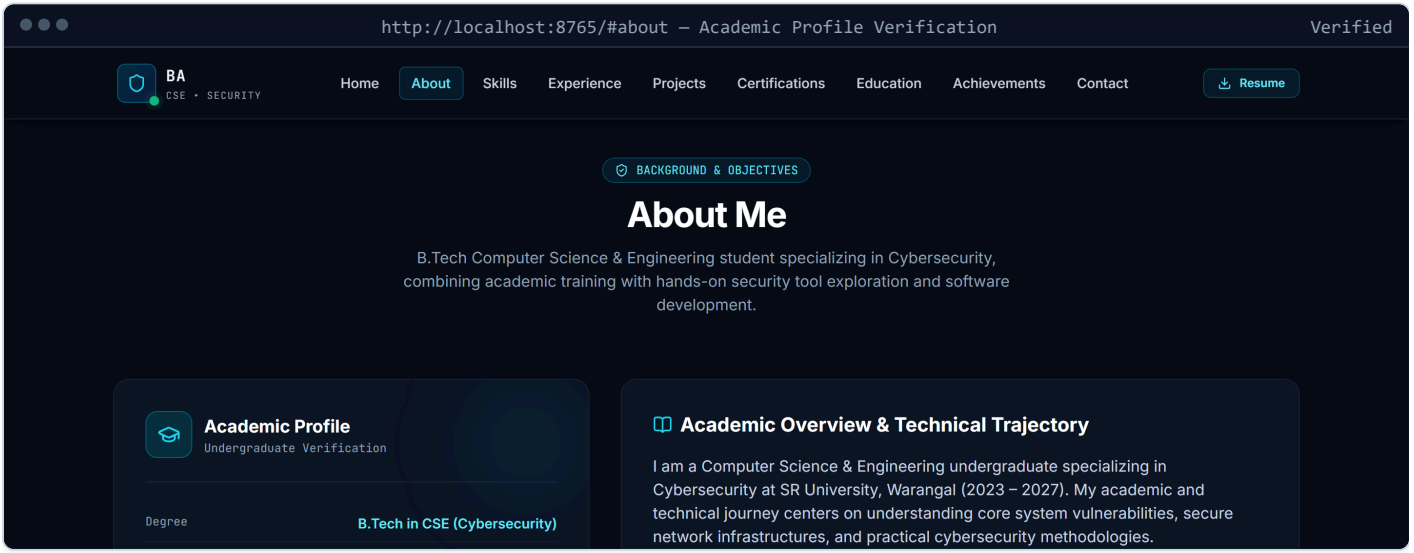

Figure 2: About Section detailing SR University enrollment, CGPA 7.1 / 10, and concise technical background.

6 Website Verification Screenshots (Part 2: Skills, Experience & Projects)

Proof 3: Categorized Skills & Tooling

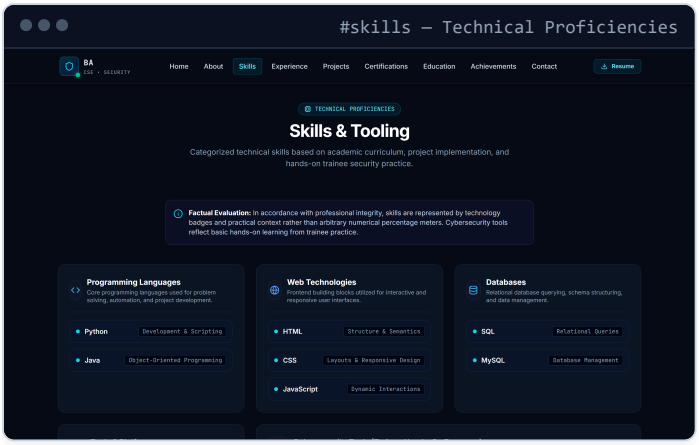

Figure 3: Categorized skill cards with "Basic Hands-On Practice" trainee badge.

Proof 4: Cybersecurity Trainee Experience

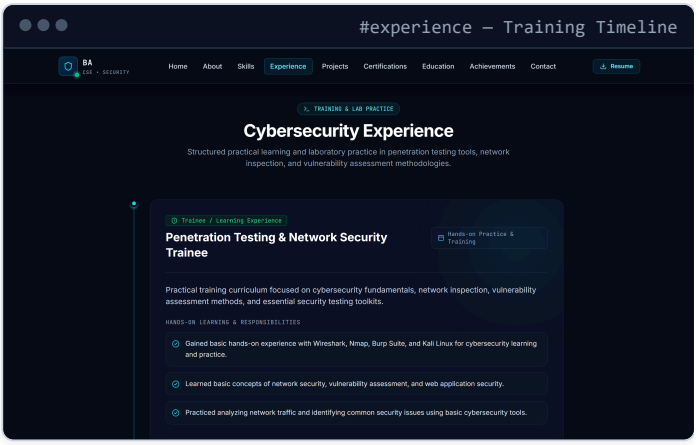

Figure 4: Penetration Testing & Network Security Trainee experience timeline.

Proof 5: Featured Projects Showcase — Supply-chain blockchain & ML-based threat detection concepts.

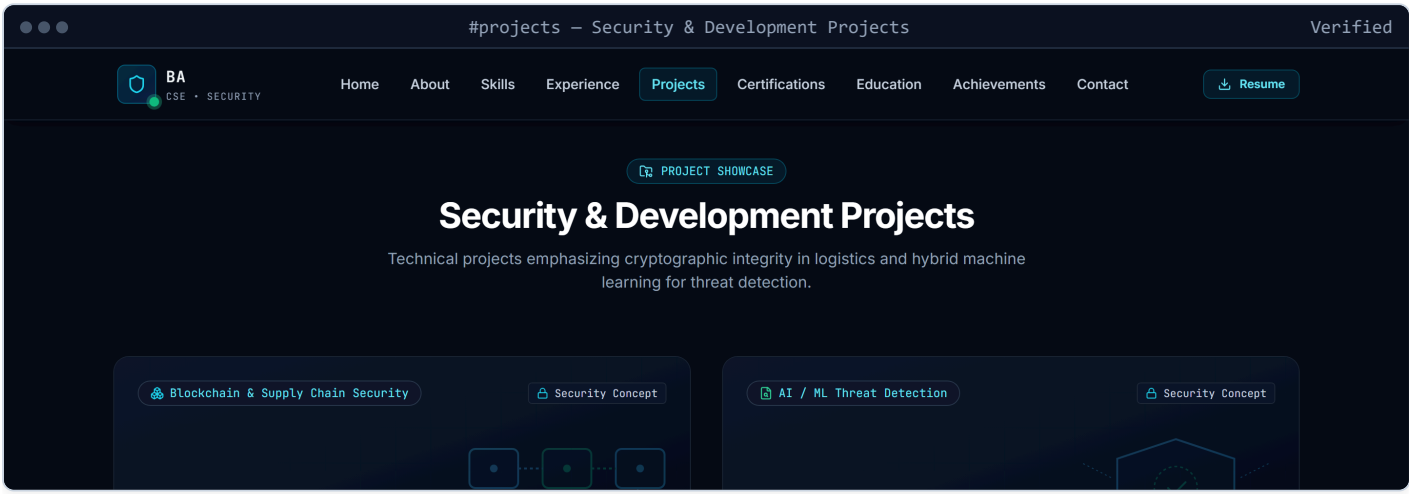

Figure 5: Project showcase displaying Eco Chain Shipping and Intelligent Phishing URL Detection cards.

Proof 6: Interactive Project Detail Modal Dialog — Opened upon clicking "View Details" to view implementation highlights.

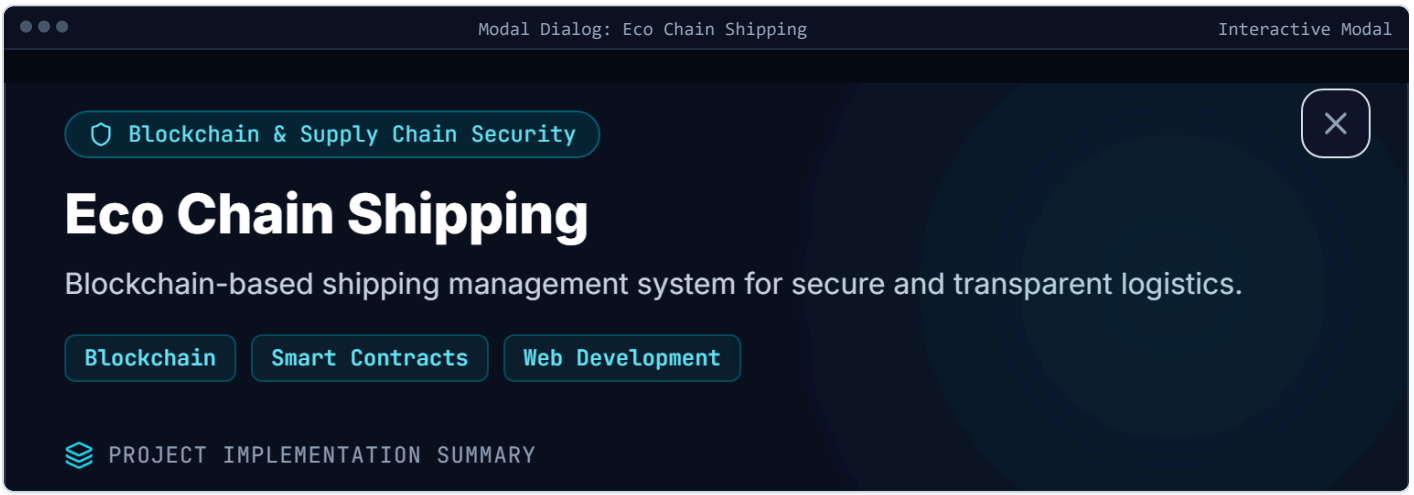

Figure 6: Interactive project details modal displaying architectural work, security relevance, and GitHub CTA.

6 Website Verification Screenshots (Part 3: Credentials, Education & Contact)

Proof 7: Certifications & Industry Credentials Grid

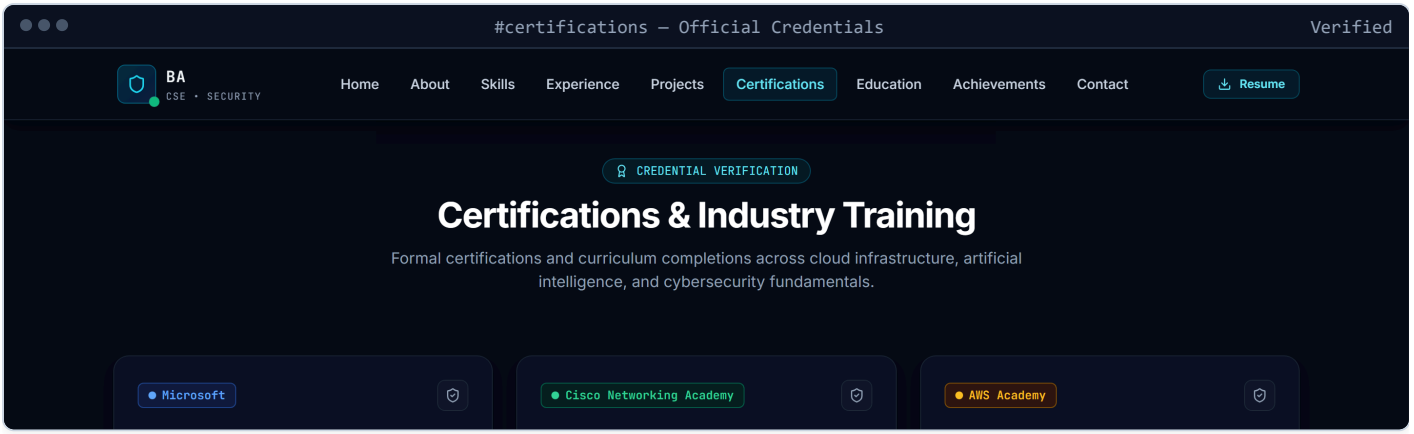

Figure 7: Official certification cards (Microsoft, AWS Academy, Cisco Networking Academy, Google/Coursera).

Proof 8: Education Timeline

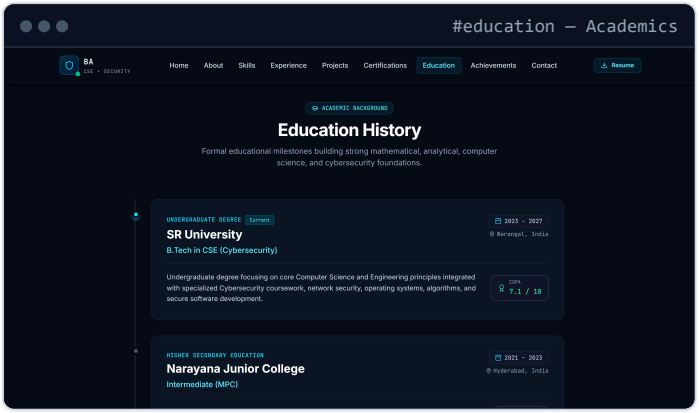

Figure 8: Academic background timeline (SR University, Narayana Jr).

Proof 9: Hackathon Team Achievement

Figure 9: Hackathon achievement card clearly stating Top 9 position as a team.

Proof 10: Contact Section with Validated Form & Direct Utilities

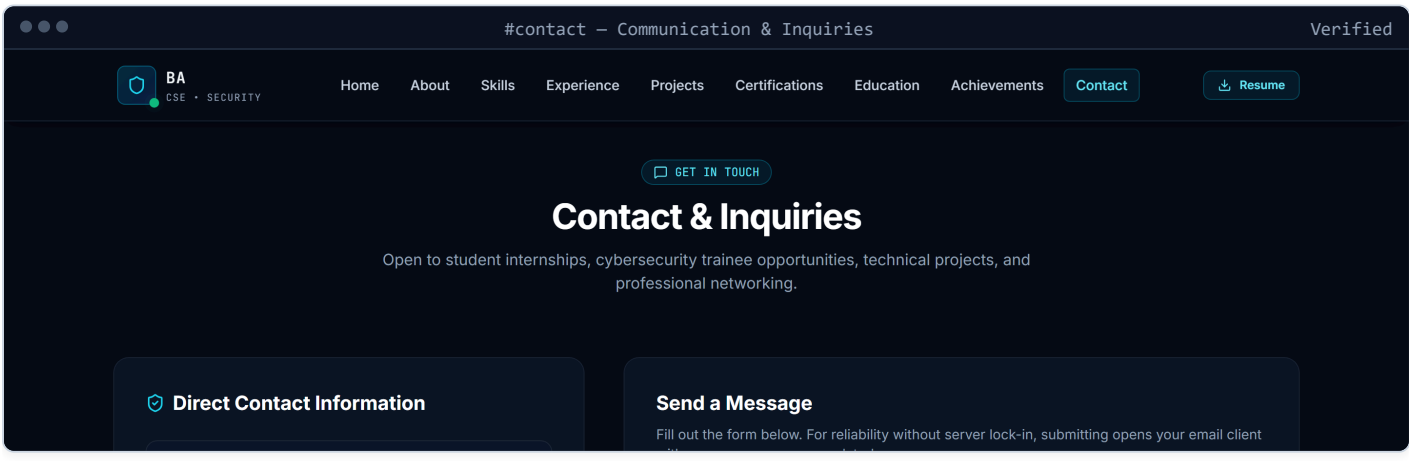

Figure 10: Contact section with verified email, phone, copy buttons, and validated message form.

7 Responsive Design Proof (Mobile Adaptation)

The website was tested across mobile, tablet, and desktop viewports. The layout dynamically adapts with collapsible navigation, touch-friendly touch targets, and flexible grid systems.

Figure 11: Mobile viewport showing fluid typography, stacked CTA buttons, and compact telemetry card.

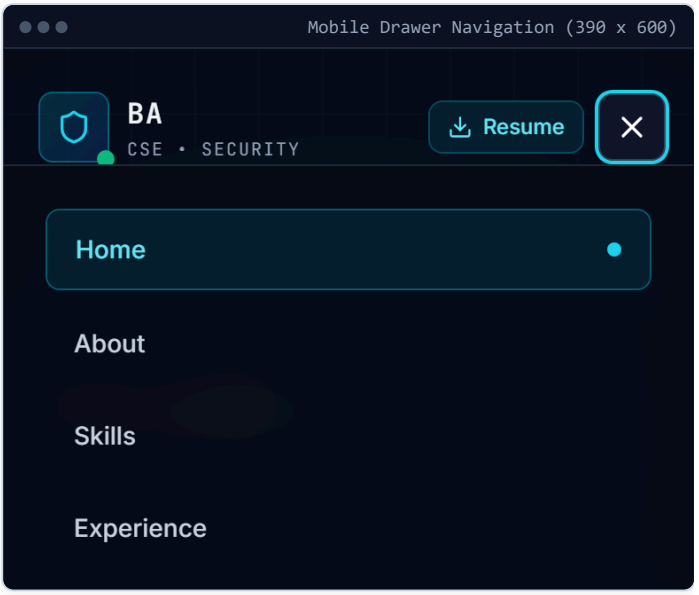

Figure 12: Mobile slide-out drawer menu with touch navigation links and resume download button.

8 Project Links & Repository Verification

GitHub Repository:	`https://github.com/akky1718-sudo/akshith-portfolio`
GitHub Pages Live URL:	`https://akky1718-sudo.github.io/akshith-portfolio/`
Render Deployment Configured:	`https://akshith-portfolio.onrender.com`
Production Build Status:	`Vite 8 production build verified (0 errors, 0 warnings)`

9 Project Completion Statement

I hereby certify that this project report represents the authentic, fully implemented **Portfolio Website Creation Project** for **Bajjuri Akshith**. The portfolio was built strictly using verified resume credentials, featuring complete sections for technical skills, cybersecurity trainee experience, projects, certifications, education, and hackathon recognition. The website is fully functional, responsive, and ready for deployment and recruiter evaluation.

Student: Bajjuri Akshith
Department: CSE (Cybersecurity)
University: SR University, Warangal

Project Status: COMPLETED & VERIFIED
Date: October 2026
Verification Hash: SHA256-VITE-PROD-OK
